Why Deanta?

P.116 - P.117 **TERMS & CONDITIONS**
The fine print.

P.118 - P.119 **BESPOKE DOORS**
Any door, any size.

THE DEANTA STORY

Deanta Doors is a 100% Irish owned company that designs and manufactures its own range of real wood veneered interior doors, frames, skirting and architrave. Our innovative designs have set the standard in modern and contemporary internal doors. We are driven by three simple ideals; delivering a quality product, excellence in customer service and a determination to continue innovating and leading the field in interior doors.

We manufacture and supply to the trade a wide range of beautifully crafted stylish interior doors including oak, walnut and white primed doors along with a selection of FD30 fire doors. Our Fire doors are Certified and manufactured to safety standard BS 476: Part 22: 1987 (Chiltern International certification). All Deanta doors are manufactured to the highest standard with only the finest of materials ensuring you get the best from your contemporary Deanta door.

We truly care about the experience our customers have with us. We welcome feedback and continually strive to deliver unsurpassed customer care. Deanta has over twenty-five years of experience in the building and design industry which we believe is fundamental in creating strong, working relationships with our clients who are suppliers to the construction industry, designers, architects, builders & the general public.

OUR COMMITMENT TO QUALITY

As with the “voice of the customer”, customer satisfaction is Deanta’s highest priority. We achieve this goal by listening to our customers and by focusing on innovation while continuously improving the cost effectiveness as well as the performance of all our products and processes. Unlike most other Irish door companies, we have our own manufacturing facility. This allows us not only to control our supply chain but quickly respond to customer feedback. With full ownership of the quality control process we seek to ensure every door that leaves our factory is of the very highest standard. Owning the process from production to distribution enables us to be extremely competitive on price, as well as surpassing expectations on service while permitting the flexibility to have doors manufactured to meet your specification.

GLASS OPTIONS

dēanta

As part of our commitment of being a one-stop shop for customers' door needs, we offer our own patented fire doors.

These doors have been extensively tested and accredited by Chiltern International Fire and satisfy all the safety needs required, so you can be confident that your home and family are protected.

Deanta's FD30 Fire Doors are rated to give 30 minutes of fire protection.

Glass Intumesant Fire Seal

Glazing Panels, Intumesant fire resistant seals are also used as part of a glazed system which secures the seals, Fire rated glass to be installed also available from suitable glazers.

Glass Intumesant Fire Seal

Door Gap must be between 2mm - 3mm. Intumesent Fire seals must be inserted to the frame, a combined smoke and fire seal is best recommended commonly known as a Brushed Seal.

GLASS INTUMESCENT FIRE SEAL
Intumescent glazing gasket

SS / BRUSHED SEAL
fire + smoke seal

CONTRACT DOORS **dēanta**

Contract Doors are made with budget in mind.

Contract Doors are the same design as Solid Core Doors. Core is made from a lighter core tubular or sectional material particle board that is not Fire Rated. The face of the door is veneered. Then we cut the V groove out of the face which is MDF (Medium-Density Fibreboard). The MDF is stained to a matching color oak or walnut. The whole process is cheaper hence the price.

All Deanta's Contract Doors are available in full fire-rated versions.

SOLID CORE DOOR

solid wood inlaid,
v-groove sanded

CONTRACT DOOR

MDF face, v-groove sanded,
stained to tone with wood

EASY-FIT *dēanta*

Deanta Doors have a new innovative range of Easy-Fit Skirting & Architrave. The Easy-Fit range will also be coming to the Oak & Walnut range of Skirting & Architrave.

SKIRTING:

Excess plaster gathering in the corners, with the chamfer at the bottom of our easy fit skirting, this is no longer an issue.

ARCHITRAVE:

Sometimes the plaster and door frame might not line up, with the 70mm x 2mm rebate at the back of the architrave you will get a smoother finish every time.

PRIMED CORNER BLOCKS

Corner Blocks are an innovative way to add a stylish finish to architrave. All Deanta's Range of Primed Corner Blocks have been primed & then sanded, before an undercoat is applied.

The Corner Blocks are then fine-sanded so the painter only needs to provide a final colour chosen by the clients. This will save a considerable amount of time & expenditure for the developer.

BEING RESPONSIBLE

We have sensor lighting throughout our site to ensure that no power is wasted when not in use.

98% of all our onsite waste is recycled.

We use mains water dispensers to reduce the use of plastic bottles and help the environment.

Solar panels on the roof of our building create enough energy to make our building self-sustainable for seven months.

BEING RESPONSIBLE

In an age where there is continued depletion of natural resources, companies throughout the world have shifted priorities to become more environmentally aware.

At Deanta, we have realised how our operations can impact the environment so we are investing heavily to become more environmentally responsible. Throughout the business we are working to reduce our carbon footprint, helping to protect our planet and ensuring we have a positive impact on our society, economy and environment. We are always looking at ways we can reduce, reuse and recycle the resources we use.

We apply environmentally friendly practises into our office and the supply chain:

- » 98% of all our onsite waste is recycled. We have recycling bins throughout the site including in our staff canteens, to make sure all Deanta employees are doing their bit for the planet.
- » We have installed solar panels on the roof of our building which creates enough energy to make our building self-sustainable for seven months.
- » All our timber is sourced from North American forests with sound environmental forest management schemes. These schemes ensure the forests biodiversity, productivity and ecological processes as well as protecting the rights of local people.
- » We have sensor lighting and taps throughout our site to help us ensure that no power or water is wasted when not in use.
- » We use mains water dispensers to reduce the use of plastic bottles and help the environment.

THE DEANTA DIFFERENCE

With an established reputation for commitment to innovative design, unsurpassed craftsmanship and excellent client service, Deanta is committed to standing out from the crowd in the door industry.

At Deanta, we manufacture all of our doors in our very own manufacturing facility. This not only allows us to control stock supply but it also allows us to have full control of the quality control process to ensure every door that leaves our factory is of the very highest standard. We have rigorous quality control procedures in place to check every single door and we stand by this with a limited 10 Year Manufacturer Warranty on all of our doors.

Our team of highly skilled craftsmen, with the help of the latest state-of-the-art technology, achieve a perfect finish to an exceptionally high standard and lasting quality to every single door. Our team are able to offer bespoke doors to meet your exact requirements – in any size and any finish. For more information about our bespoke design service please refer to page 7.

Above all else, what truly makes us stand out from the rest is our customer care. We truly care about the experience our customers have when they deal with us. We welcome feedback and continually strive to offer unsurpassed customer care. We are a company that gives solutions, not problems.

Deanta has over twenty-five years of experience in the building and design industry which we strongly feel is fundamental in building strong, sound working relationships with our clients who are mostly door merchants – and to their customers – designers, architects and builders. That's why they keep coming back to us.

TERMS & CONDITIONS

We offer a limited ten year warranty on all our doors. Any Deanta door that warps* or splits will be covered by our warranty once the installation has met all guidelines. Please note colour variance in the wood is not considered a manufacturing fault as it is a natural product.

THE FOLLOWING MUST BE CARRIED OUT TO ENSURE THE BEST PERFORMANCE FROM YOUR DEANTA DOOR.

- » All doors must be examined immediately on receipt and prior to installation as claims or faults will not be accepted once the door has been installed or altered. This excludes manufacturing faults that occur after hanging.
- » All doors must be measured individually when having glass fitted. Deanta doors are hand-assembled, and as such, we cannot guarantee each aperture is the exact same size. We recommend you use a qualified glass fitter.
- » Doors must be stored horizontally on a clean, dry, flat and level surface.
- » Doors must not be fitted in a house that is freshly plastered and doors should only be delivered to site after all wet trades are finished and sufficiently dried. A moisture reading taken by an engineer must be recorded.
- » For doors to acclimatize, they should be left in the house prior to installation for at least 21 days with the ambient temperature gradually increased over this period.
- » Should a door require alteration, cutting or planing, it must be immediately revarnished to prevent moisture absorption which may lead to warping or splitting.
- » Take no more than **10mm** (30mm for FD30) off the width and height of doors in equal amounts on all edges. Planed edges of prefinished doors must be refinished using three coats of internal wood finish.
- » We recommend the use of three sets of hinges per door.

- » We recommend varnish and lacquers that are suitable for interior joinery. If using oils please contact Deanta for recommended brands.
- » Should a door be removed from its original packaging. It can not be returned.
- » Should a door be hanged, it can not be returned.

UNDER OUR WARRANTY, OUR LIABILITY IS LIMITED TO REPLACING THE DOOR AND NO LIABILITY IS ACCEPTED FOR ANY CONSEQUENTIAL COSTS. ALTERATION OF A DEANTA DOOR WILL VOID THE WARRANTY.

*Warp/bow/cup/twist (as set out in the relevant Building Standards) shall not be considered a defect unless it exceeds 1/4 inch (6.35mm) in the plane of the door itself. Warp is any distortion in the door itself and does not refer to the relationship of the door to the frame or jamb in which it is hung.

*FIRE DOOR DISCLAIMER - Doors with a fire door symbol are only available in the solid and unglazed options.

*TOUGHENED GLASS DISCLAIMER - In accordance with BS EN 12150 and BS EN 12600 we use toughened glass in all our glass doors. Toughened glass is glass that has gone through controlled thermal processes to increase its strength compared to normal glass. In the event of an abnormal impact to toughened glass, the glass shatters into small fragments instead of sharp shards making it safer and less likely to cause injury.

For more information on our warranty please visit our website at: www.deantadoors.ie.

STOCKISTS

We have stockists throughout the island of Ireland. To find your nearest retailer please visit our website.
