A NEW NATURAL, REAL VENEER FINISH

Brushed Black

BOLD. NATURAL. TIMELESS.

A bold, modern finish crafted from real North American Oak veneer. Light brushing reveals 20% open grain for natural texture. Finished with premium water-based black dyes for a rich, deep tone that enhances the wood's character.

The New Art Deco Collection

A bold fusion of geometric elegance and industrial minimalism, this door range draws inspiration from classic Art Deco design. Featuring striking symmetrical patterns, circular motifs, and crisp linear detailing, each model offers a distinctive character — perfect for modern interiors that value both form and function.

20 years' experience

Deanta offers over 20 years' experience in supplying internal doors and ironmongery.

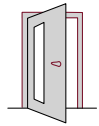

Manufactured by Deanta

Our doors are made in Deanta's own manufacturing facility.

Leading distributor in Ireland

Deanta is one of the Ireland's leading distributors of premium internal doors, ensuring your order is delivered smoothly and efficiently.

Bespoke Doors

Choose a bespoke door and design your perfect door and our skilled craftsmen will bring your ideas to life..

Natural grain

All of Deanta's oak, walnut and light / dark grey ash doors have the look and feel of real timber.

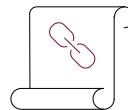

Lippings

Deanta doors have one of the largest solid lippings in the UK & Ireland interior door market.

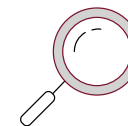

Quality control

Deanta's quality control processes ensure provision of robust, solid core doors of the highest quality.

Chain of certification

Deanta has a complete chain of certification with Certifire and BM TRADA Q-Mark to provide the highest quality products.

Hand-picked veneers

Deanta doors are made from specially selected veneers from North America.

Why choose Deanta

We are not just another door company. We manufacture a wide range of beautifully designed stylish interior doors for the UK & Ireland markets. Our doors are made to the highest possible standard with only the finest materials paired with unsurpassed craftsmanship, ensuring you always get the best from your Deanta door. With over 20 years' experience in interior door design, manufacture and supply, Deanta has built a reputation for quality coupled with forward-thinking innovation.

Our commitment to quality

Customer satisfaction is Deanta's utmost priority. We achieve this by continuously pushing the boundaries to ensure that our products and services surpass the needs of our customers and inspire end-users. As a UK & Ireland manufacturer producing doors, glazing options and ancillary products in-house we are able to ensure high quality production and an uninterrupted, managed supply chain. We are confident that every Deanta door is expertly made from quality materials, ensuring you get the best from your contemporary Deanta door.

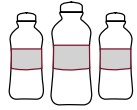

Deanta produce robust, solid core doors that are finished with specially selected crown cut and diamond cut veneers from North America. Our prefinished black and white primed doors also feature solid cores providing extra strength and stability, making them the best in the UK & Ireland markets. With one of the largest solid lippings available in the UK & Ireland internal door markets, our doors can be adapted to fit into any sized opening. Our oak, walnut, light / dark grey ash and white primed doors can have a total of 32mm taken off the width and height of the door. For our fire doors 30mm (total) can be taken off the width and height of the door, Urban Collection 3mm (total) and 6mm (total) on our Architecture range.

Our design team take inspiration from the latest interior design trends to create new, exciting styles to add to our ever-growing collection. And our rigorous testing procedures ensure that only the best doors make it to market.

Our commitment to safety

Fire safety is at the core of our business. Deanta fire doors are extensively tested by independent third-party certification schemes to ensure the maximum level of safety. All our fire-rated products are extensively tested and accredited by third-party certification schemes. Every 30-minute fire door are tested to EN1634-1 (EI30 doors) and/or certified by the BM TRADA Q-Mark, Certifire scheme.

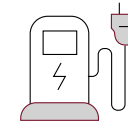

Reduced plastic

We use mains water dispensers to reduce the use of plastic bottles and help the environment.

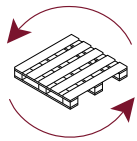

Sensor lighting

We have sensor lighting throughout our site to ensure that no power is wasted when not in use.

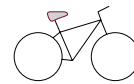

Electric charging points

Our site is fitted with electric charging ports to encourage the use of electric cars.

Pallet reuse initiative

At Déanta we are committed to reducing the dumping of our pallets and have committed to reusing our pallets.

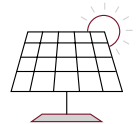

Bike to work scheme

We encourage our employees to take up the bike to work scheme.

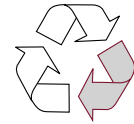

Carbon neutral printing

All carbon emissions created by producing this print job will be offset through a recognized carbon offset project.

Self sustaining

Our solar panels create enough energy for our building to be self-sustainable for seven months every year.

Recyclable waste

We reduce our impact on the environment by recycling 98% of all our on-site paper and wood waste.

Water-Based Finishes

We use all paints and lacquers water-based with very low VOCs, safer, eco-friendly, evaporate during drying, leaving durable, safe finishes.

Being Responsible

Our commitment to the environment

At Deanta we strive to provide our customers with the best products without compromising on our commitment to quality; to ensure sustainability throughout our supply chain and take ownership of our environmental responsibilities. We are focused on reducing our carbon footprint, helping to protect our planet through recycling on-site paper and wood waste, establishing a positive impact on our society, economy, and the environment. At Deanta we have implemented many schemes to achieve this commitment.

At a time where there is continued depletion of natural resources it is our responsibility to ensure that we are using timber from forests that use best practice and recognized schemes to maintain forest biodiversity, productivity and ecological processes as well as protecting the rights of the local people.

The mark of
responsible forestry

Deanta Doors is FSC® Chain of Custody certified for the purchase, storage and sale of FSC® 100% and FSC® Mix products.

FSC® certification applies only to products where the FSC claim is specified.

We are committed to responsible sourcing and can trace timber back to well-managed forests.

Ask about our FSC® range.

HELPING OUR PLANET

Deanta is committed to doing our part for the environment, by carbon balancing our collection brochure we have offset 10.010 tCO₂e with Carbon Footprint below.

WALL PANELLING

WR1 WALL PANELLING

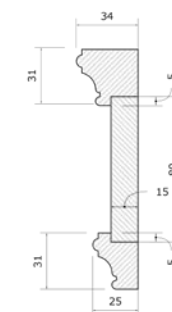

Revamp your room with our simple, elegant and affordable “Edwardian” wall panelling. Not only is “Edwardian” wall panelling inexpensive and can save you considerable time, it is also easy to install, complementing the Deanta range of quality doors, skirting, architrave and door hardware.

Single pack of wall panelling comes with:

- 1 x (2400mm x 34mm x 31mm) length of large (top) beading
- 4 x (2400mm x 80mm x 15mm) lengths of board panelling
- 4 x (2400mm x 25mm x 31mm) lengths of (inside) beading

For further information visit our website at www.deantadoors.ie or please contact your local stockist.

Wall panel a typical 15 x 8ft hallway from as little as €325

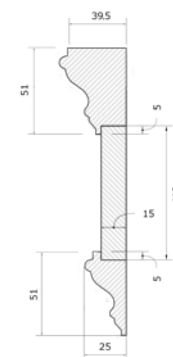

The WR2 wall panel is the must have for this year. Inspired by the WR2 door this panel is both stylish and elegant in its form and will make a huge statement in any room. The WR2 wall panel is inexpensive and easy to install and compliments the full range of Deanta products.

Single pack of wall panelling comes with:

- 1 x (2400mm x 39.5mm x 51mm) length of large (top) beading
- 4 x (2400mm x 110mm x 15mm) lengths of board panelling
- 4 x (2400mm x 25mm x 51mm) lengths of (inside) beading

ACOUSTIC WALL PANELLING

Our newest addition to the world of interior design - Acoustic Wall Panelling. This revolutionary product takes inspiration from stylish interior finishes and combines them with exceptional acoustic insulation, making it a versatile choice for any home interior. The panelling comes in a range of finishes, including oak, walnut, light Grey ash, or black primed panelling, each offering a unique depth of texture.

Our acoustic wall panels are easy to install and require minimum maintenance, making them the perfect choice for any home or commercial space.

For further information visit our website at www.deantadoors.ie or please contact your local stockist.

ACOUSTIC OAK LAMINATE

The warm tones and pronounced grain patterns of oak veneer bring a timeless quality to a home. Loved for its longevity and constancy, oak is a cultural icon – a reliable building material and universal style.

Each panel comes in 2400 x 600 mm and seamlessly fit together side by side, overlapping to complete a wall of any size with minimal at home alterations. Acoustic panels can be cut to fit around windows, doors, alcoves, plug sockets and light switches easily.

ACOUSTIC BLACK LAMINATE

Beautifully finished black panels, laid over dark sound-absorbing felt, bring a sense of chic sobriety to a room. Barely distinguishable against the dark sound-absorbing felt backing, these black acoustic panels add depth and texture to your walls.

Each panel comes in 2400 x 600 mm and seamlessly fit together side by side, overlapping to complete a wall of any size with minimal at home alterations. Acoustic panels can be cut to fit around windows, doors, alcoves, plug sockets and light switches easily.

ACOUSTIC VENEER WALL PANELLING

ACOUSTIC PREFINISHED WALNUT VENEER

The rich brown tones and long, complex grain patterns of crown-cut walnut veneer evoke an air of dignity and quiet opulence. Set off against the dark felt backing, walnut acoustic wall panels bring a touch of sophistication to an interior space.

Each panel comes in 2400 x 600 mm and seamlessly fit together side by side, overlapping to complete a wall of any size with minimal at home alterations. Acoustic panels can be cut to fit around windows, doors, alcoves, plug sockets and light switches easily.

ACOUSTIC PREFINISHED LIGHT GREY ASH VENEER

The soft, smoky tones and subtle grain patterns of light-grey ash veneer are a beautiful complement to the on-trend muted décor that's popular with many contemporary home owners. Light-grey ash veneer is gentle on the eye, adding a sense of calm fluidity to a home.

Each panel comes in 2400 x 600 mm and seamlessly fit together side by side, overlapping to complete a wall of any size with minimal at-home alterations. Immerse acoustic panels can be cut to fit around windows, doors, alcoves, plug sockets and light switches easily.

ACOUSTIC VENEER WALL PANELLING

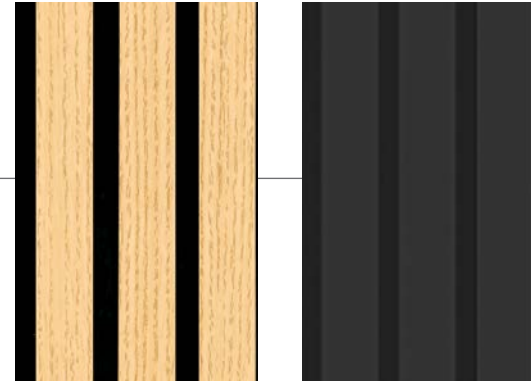

ACOUSTIC PREFINISHED OAK VENEER

The warm tones and pronounced grain patterns of oak veneer bring a timeless quality to a home. Loved for its longevity and constancy, oak is a cultural icon – a reliable building material and universal style.

Each panel comes in 2400 x 600 mm and seamlessly fit together side by side, overlapping to complete a wall of any size with minimal at home alterations. Acoustic panels can be cut to fit around windows, doors, alcoves, plug sockets and light switches easily.

The new oak acoustic panels are now also available in a oak laminate contract finish.

Brushed Black

Crafted from premium North American Oak, Brushed Black features a real, natural veneer finish that showcases the authentic grain of the timber. The surface is lightly brushed, allowing approximately 20% open grain to remain visible — adding natural texture and depth. To achieve its rich, dark tone, we use premium water-based black dyes, enhancing the wood’s character while maintaining an eco-conscious approach. This refined black finish balances contemporary style with the warmth of natural wood.

The New Art Deco Collection

A bold fusion of geometric elegance and industrial minimalism, this door range draws inspiration from classic Art Deco design. Featuring striking symmetrical patterns, circular motifs, and crisp linear detailing, each model offers a distinctive character — perfect for modern interiors that value both form and function.

RAL 9011

Finished in Solid Black (RAL9011)

Doors come predecorated with a factory-applied finish and are ready to hang.
Fitted with laminated safety glass, installed at the factory.

*Glass fitted at the factory

A modern interior scene featuring a white door with a glass panel, a white desk lamp, a white bookshelf filled with books, and a black leather armchair. The room has light-colored walls and a light wood plank floor. The door has a silver handle and a glass panel showing a reflection of the room. The bookshelf is filled with various books, and the armchair is a sleek, black leather design.

As part of our partnership with Lorient, all of our fire doors have been acoustically tested up to Rw 31dB using their acoustic sealing systems.

These doors have been tested and have achieved a Decibel rating of 31dB when fitted with a LORIENT Drop Seal, Smoke & Fire seal, Perimeter seal.

Flush Oak

BATWING® PERIMETER SEAL

PVC with elastomeric fins

1

An acoustic and smoke perimeter seal which minimises the opening and closing resistance of the door leaf due to its unique, curved fins. Flexible elastomeric fin material springs back to original shape to provide ongoing performance and durability in service. Installed at the head and jambs of single and double leaf doors.

- 10mm x 10mm x 2100mm
- Durability: minimum of 100,000 cycles
- Suitable for EI30 and EI60 Doors

LAS8001 SI DROP SEAL

Aluminium with silicone rubber

2

Aluminium based drop seal for acoustic, smoke and energy containment. Features a high efficiency mechanism which lifts the seal clear of the floor as soon as the door is opened. Fitted onto single swing doors, for use on both right and left-handed doors.

- 14mm x 35mm x adjustable length
- 1mm/13mm gap size
- Self-levelling on uneven surfaces
- Suitable for EI30 and EI60 Doors

DS ACOUSTIC, SMOKE & FIRE SEAL

PVC with elastomeric fins

3

DS door seal offers the ultimate in acoustic, smoke and fire protection, with the added benefit of thermal containment. Its unique design means that whichever way round the product is installed, the seal can always be fitted in the correct place, maintaining the integrity of the acoustic and smoke seal at the ironmongery points.

- 15mm x 4mm x 2100mm
- Available in black and white finish
- Suitable for EI30 and EI60 Doors

DS FIRE SEAL / INTUMESCENT STRIP

PVC encased sodium silicate

3

Our intumescent strips for fire doors offer fire protection where no smoke sealing is required. Combine a fire seal with a Batwing® seal for additional acoustic and smoke containment.

- 15mm x 4mm x 2100mm
- Available in black and white finish
- Suitable for EI30 and EI60 Doors

dēanta

Contract doors are made with your budget in mind.

Contract Doors are the same design as solid core doors, however our contract door core is made from a lighter core tubular or sectional material particle board, that is not fire rated. The face of the door is veneered. Then we cut the V groove out of the face which is MDF (Medium-Density Fibreboard).

The MDF is stained to a matching colour oak or walnut. The whole process is more economical and so we can offer you a more competitive price.

Paint grade contract doors are also manufactured with a lighter core, making them a budget-friendly option, and are supplied factory primed and ready for final painting, providing a smooth, consistent surface ideal for a painted finish.

SOLID CORE DOOR

Solid wood inlay,
v-groove sanded.

CONTRACT DOOR

MDF face,
V - groove sanded & stained
to tone with wood.

DOOR FRAMES

dēanta

Deanta Door Frames – the perfect complement to your interior design. Our standard door frames, complete with a removable stop, provide versatility and ease of installation. For added convenience, we offer rebated door frames, including fire rebated door frames for enhanced safety.

Choose from a range of finishes to suit your style, including primed, walnut, oak, and light grey ash veneer. Our frames are crafted with a combination of finger joint solid wood, plywood and MDF, ensuring durability and stability.

In addition to our standard and rebated door frames, we also offer a contract version exclusively made from plywood, available in the primed finish. This option provides a cost-effective solution without compromising on quality.

(Frames to be fitted after plastering is completed and dry only).

REMOVAL STOP

A door frame with a removable stop features a flexible design that allows the stop to be easily removed or adjusted, providing convenient access for door installation and maintenance. This design ensures a clean and customizable finish while allowing for easier door adjustments.

FIRE REBATED

The fire rebated door frame is designed with a groove to securely hold an intumescent strip, providing enhanced fire resistance. This frame ensures a tight seal during a fire, helping to contain smoke and heat for improved safety.

*Intumescent strips are not included in the set. For more information, please contact our sales team.

Once we receive your enquiry we will send a quotation and lead time to you.

Step 3

You will receive a technical drawing and once approved, your door will go into production and lead time is confirmed.

Step 4

Your bespoke doors are delivered direct to your home.

FIRE DOORS

Technical Fire doors Fire door solutions

Fire safety is at the core of our business. Because we manufacture all of our own doors, we can ensure that every single component, not only meets the required standards, but exceeds them. We invest heavily in research and development to provide you with the safest, most reliable fire door products on the market.

All our fire-rated products are extensively tested and accredited by third-party certification schemes. Every 30-minute fire door are tested to **EN1634-1 (EI30)** and/or is certified by the **BM TRADA Q-Mark, Certifire scheme**.

When tested to EN 1634-1, a door fire-rated to EI30 must not permit a fire to propagate for at least 30 minutes.
FD30/60 = BS476

Important Product Notice

Please note that fire doors and standard doors may appear very similar in design. However, their dimensions and construction can differ.

We recommend that fire doors and standard doors are not used side by side where a perfectly matched appearance is required.
